

**SYNTHETIC RISK REWARD INDICATOR**

Equity and property investments are volatile by nature and subject to potential capital loss. For credit and income instruments, while unlikely, capital loss may also occur due to an event like the default of an issuer.

**FUND OBJECTIVE**

The Income MultiFund aims to provide a lower risk, lower volatility investment option over the medium to longer-term.

The Sub-Fund is actively managed and is not managed in reference to any benchmark. It is managed by reference to a performance target which is to outperform USD 3 month LIBID over a minimum three years.

**SUITABILITY & RISK AND REWARD**

The Income MultiFund is suitable for clients with an investment time horizon of a minimum 3 years. Investing in the fund involves a risk to capital in order to achieve the desired return.

To achieve the investment objective, the portfolio is principally fixed income focused but allows for 20% allocation to other asset classes. The principal aims are income generation and capital protection and the strategy has flexibility to invest across the full spectrum of global bond markets. The income share class will pay dividends on a quarterly basis on the last business day in March, June, September and December.

Portfolio construction provides exposure to active fixed income managers, who are expected to outperform their defined benchmarks. Blending actively managed fixed income funds together in this way creates a competitively priced investment solution.

<sup>1</sup> The annualised total return is the average return earned by an investment each year over a given time period. Performance is calculated for the portfolio and individual investment performance may differ as a result of initial fees, the actual investment, the actual investment date, the date of any reinvestment and dividend withholding tax. <sup>2</sup> The on-going fee is a measure of the actual expenses incurred in the management of the Classes of the Sub-Fund. The on-going fee shown is expressed as a percentage of the monthly average value of the portfolio calculated over a 12-month period as at the date shown. The current on-going fee cannot be used as an indication of future on-going fees. A higher on-going fee does not necessarily imply a poor return, nor does a low on-going fee imply a good return.

March 2021

## MARKET COMMENTARY

March, as with the quarter as a whole, posted strong returns for risk assets. Equity markets continued their rise, albeit with some notable sector rotation along the way, with the S&P500 reaching new highs and settling above the historic 4,000 level. All this was against a backdrop of rising COVID rates in large parts of Europe, India and South America and fears of further restrictions. But the overarching COVID narrative remained focused on the vaccine rollout that continued to build momentum, with both the US and UK leading the way and shedding a tantalising light on the potential for a vaccine led recovery.

And recovery was at the forefront with indicators pointing towards a sharp uptick in global economic activity, the US in particular showing signs of a pronounced recovery with payroll numbers towards the end of the month surprising on the upside. This continues a trend of falling unemployment and rising production.

Bond markets continued to show signs of weakness at the longer end albeit without quite the same pronounced shift in yields that we saw earlier in the quarter. Our favoured area of short duration high yield managed to protect against much of the weakness.

Finally, it was little surprise to see the US dollar gaining slightly on the month, a reflection of investor expectations around hikes from the Federal Reserve to counter the inflationary effect of fiscal stimulus. Whether the Fed are accommodating of a 'hot' economy during the recovery phase remains to be seen, but the strength in the US dollar reversed a weakening trend seen during 2020.

## PORTFOLIO COMMENTARY

The Nedgroup Investments Income MultiFund rose by +0.2% in March.

Within fixed income, our bias towards shorter maturity bonds helped to generate positive returns and protect capital in a rising interest rate environment. The short maturity high yield exposures, Muzinich Short Duration High Yield (+0.5%) and AXA US Short Duration High Yield (+0.5%), were the best performing fixed income funds. However, the position in short duration US Treasuries, via iShares \$ Treasury Bond 1-3 Years ETF (+0.1%), also protected capital as bond yields rose. Rising longer term yields, nonetheless, negatively impacted our more traditional longer maturity bond holdings in Wellington Global Credit Plus (-0.1%), PIMCO Global Investment Grade Credit (-0.6%), and Vanguard US Government Bond Index Fund (-1.5%).

In other asset classes, our more cyclically exposed high dividend paying UK stocks position in the iShares UK Dividend ETF (+7.1%) advanced strongly over the month. The UK care home REITs, Impact Healthcare (+4.1%) and Target Healthcare (+1.4%), also performed well. However, the COVID-19 restrictions in the UK continued to weigh on our more traditional commercial property exposure, BMO Commercial Property Trust (+0.2%).

Another capital raise meant that most of our renewable energy holdings lagged other asset classes over the period. The Renewables Infrastructure Group (-5.1%) announced a discounted capital raise which weighed on similar holdings such as: Greencoat Renewables (-0.9%) and JLEN Environmental Assets Group (-0.3%). Greencoat UK Wind (+0.9%) was in fact the only renewable energy exposure in positive territory over the month. 3i Infrastructure (+1.9%), our infrastructure holding, followed broader equity markets higher. Whilst the two asset-backed lending exposures were mixed, GCP Asset Backed Income (+0.9%) continued to move higher, KKV Secured Loan Fund C-Shares (-2.4%) gave up a bit of ground after a very strong February. Finally, our two exposures to song copyrights were also mixed. Hipgnosis Songs Fund (+10.1%) rallied strongly after improved revenue disclosure helped to waylay some investor concerns about the lack of information. In comparison, Round Hill Music Royalty Fund (-2.1%) struggled during March, in part due to a delay in acquiring a share in a specific song catalogue.
