Typically lower rewards						Typically higher rewards

Equity and property investments are volatile by nature and subject to potential capital loss. For credit and income instruments, while unlikely, capital loss may also occur due to an event like the default of an issuer. For full details of risks, please refer to the risk section in the Prospectus and KIID.

GENERAL INFORMATION

PERFORMANCE INDICATOR: Cash +1% to +3% over a minimum 3 years (USD: 3M SOFR / GBP: 3M SONIA)

APPROPRIATE TERM: Minimum 3 years

MORNINGSTAR CATEGORY: 50/50 average of the Morningstar Moderate Allocation USD and Morningstar Cautious Allocation USD

INVESTMENT MANAGER: Nedgroup Investments (IOM) Limited; licensed by the Isle of Man Financial Services Authority.

An Isle of Man based fund manager providing investment management services to assets in excess of USD 5bn.

FUND LEGAL STRUCTURE: Irish OEIC UCITS
DOMICILE OF FUND: Ireland
INCEPTION DATE: 19 August 2011
Class A USD: 19 August 2011 Class A GBP: 19 August 2011
Class B USD: 01 September 2011 Class B GBP: 15 March 2012

FUND OBJECTIVE

The Balanced MultiFund aims to provide moderate levels of growth with moderate levels of risk and volatility over the medium to longer-term.

The Sub-Fund is actively managed and is not managed in reference to any benchmark. It is managed by reference to a performance target which is to outperform USD 3M SOFR +1% to 3% over a minimum three years.

SUITABILITY & RISK AND REWARD

The Balanced MultiFund is suitable for clients with an investment time horizon of a minimum 3 years. Investing in the fund involves a risk to capital in order to achieve the desired return.

To achieve the investment objective, the portfolio invests across a range of asset classes within a strategic and tactical asset allocation framework designed to maximise diversification benefits. An absolute and relative valuation-based approach underpins this framework, resulting in a multilayered process to facilitate disciplined decision-making and risk management.

Portfolio construction combines exposures to active fund managers, who are expected to outperform their defined benchmarks and passive investment vehicles which provide low cost access to markets. This blend of active and passive funds is used to create a competitively priced investment solution.

Class A performance net of fees as of 31 March 2022. * Since inception annualised.

USD peer group is a 50/50 average of the Morningstar Moderate Allocation USD and Morningstar Cautious Allocation USD . The GBP is simulated performance based on the same competitor universe and returns are used as for the USD data, although a 65% hedge to sterling is applied net of fees, as per the fund's GBP share class. Past performance is not a guide to future returns.

For full details on fees and charges, please see the Prospectus and Supplement.

1) The annualised total return is the average return earned by an investment each year over a given time period. Performance is calculated for the portfolio and individual investment performance may differ as a result of initial fees, the actual investment, the actual investment date, the date of any reinvestment and dividend withholding tax. Data source Nedgroup Investments (IOM) Limited.

2) The on-going fee is a measure of the actual expenses incurred in the management of the Classes of the Sub-Fund. The on-going fee shown is expressed as a percentage of the monthly average value of the portfolio calculated over a 12-month period as at the date shown. The current on-going fee cannot be used as an indication of future on-going fees. A higher on-going fee does not necessarily imply a poor return, nor does a low on-going fee imply a good return.

KEY RISKS

- The Fund could lose money if a counterparty with which the Fund trades becomes unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.
- Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.
- The Fund invests in other funds (including exchange traded funds and investment trusts/companies), which may introduce more risky assets, derivative usage and other risks, as well as contributing to a higher level of ongoing charges.
- The Fund may use derivatives with the aim of reducing risk or managing the portfolio more efficiently. However this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations.
- If the Fund holds assets in currencies other than the base currency of the Fund or you invest in a share class of a different currency to the Fund (unless 'hedged'), the value of your investment may be impacted by changes in exchange rates.
- Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.
- The value of an investment and the income from it can fall as well as rise and you may not get back the amount originally invested.
- Tax assumptions and reliefs depend upon an investor's particular circumstances and may be subject to change.

NEDBANK PRIVATE WEALTH
SINCE 1834

March 2022

MARKET COMMENTARY

After a very strong 2021, the first quarter of 2022 proved more of a challenge for markets. Concerns over rising inflation, tightening monetary policy, and the Russian invasion of Ukraine, meant most asset classes lost ground over the quarter.

Russia's invasion of Ukraine towards the end of February was unquestionably the main story of the quarter. While Russia is not a very large part of the global economy, Russia is a major energy and commodity producer (Ukraine is also a sizeable exporter of wheat and sunflower oil) and the escalation of tensions pushed energy and commodity prices to extreme levels, exacerbating the surge in inflation caused by supply chain disruptions as a result of the pandemic, and acted as a risk to global growth; especially given the dependency of Europe on Russian gas and crude oil.

High and persistent inflation, largely as a result of supply-side issues, meant that the central bank narrative that inflation was "transitory" began to change at the beginning of the year, and over the quarter central banks became gradually more hawkish, driving bond yields higher. In fact, the US Federal Reserve raised its target rate by 0.25% in March, the first time since the pandemic, with the expectation that many more increases will be necessary over the next two years. The Bank of England raised its policy rate twice in the first quarter, reaching 0.75%. These increases in interest rates, albeit from a very low level, indicate that despite the uncertainties and economic effects related to the geopolitical situation, central banks view inflation, and keeping longer-term inflation expectations well anchored, as paramount, unless the growth outlook deteriorates sharply. With unemployment currently at post-pandemic lows in many countries, but inflation at multi-decade highs (US 7.9%, UK 6.2%, Europe 7.5%), you can understand why central banks are starting to tighten monetary policy. The dilemma for central banks, over the next few years, will be stemming inflation without tipping economies into recession.

It would be fair to say that, although March saw developed markets recover some lost ground, it was not a good quarter for risk assets, with many equity markets posting their first quarterly loss since the onset of the pandemic in Q1 2020. Global equity markets fell -4.7% on the quarter, despite rallying +2.5% in March, with the areas more economically exposed to the Russia - Ukraine situation either directly, such as Emerging Markets (-6.1%), or indirectly, such as Europe ex-UK (-5.4%), falling the most during the quarter. It may come as some surprise but the UK stock market (+4.7%) was one of the best performing regions, as it benefited from its relatively high weight to materials and energy stocks. In terms of style, growth stocks (-9.7%) significantly underperformed the more value / cyclically (-0.8%) orientated equities. This was also reflected in sector performance with higher valued Consumer Discretionary (-11.3%), Communication Services (-10.5%), Information Technology stocks (-10.2%) falling considerably, while cheaper Materials (+2.8%) and Energy (+21.4%) sectors rose, with the latter being supported by the sharp rise in the price of oil and gas.

Turning to fixed income markets, despite the brief "flight to safety" when Russia invaded Ukraine, there was no place "to hide" in fixed income during Q1, with rising inflation, the expectation of faster rate hikes from central banks, combined with falling equity markets / risk appetite putting all bond markets under pressure. Looking at the detail, global government bonds (-4.2%) and global investment grade credit (-6.8%) posted a big negative return over the quarter, whilst at the risker end of the spectrum global high yield (-5.5%) and emerging market hard currency debt (-9.3%) also declined steeply as spreads widened.

In terms of real assets, global infrastructure (+3.4%) performed well over the quarter led by electricity generation, whilst global property markets slightly outperformed global equity on a relative basis with the global REITs index down -3.4% over the period. However, commodities stole the show yet again (after a very strong 2021) with the Bloomberg Commodity Index (+25.5%) up sharply in Q1, led mainly by Crude oil (+38.3%), Industrial metals (+22.7%) and Agriculture (+19.9%) as a result of supply concerns due to the war between Russia and Ukraine. Gold (+6.6%) also jumped higher due to related risk-off and inflation fears but nowhere near the magnitude of the other commodities.

PORTFOLIO COMMENTARY

The end of March saw the Balanced MultiFund increase +1.2% on the month but close the quarter down -2.8% for the USD share class. This follows a strong period of growth with the one year return comfortably ahead of both peer group and longer term cash (+) targets. The GBP share class rose +1.8% on the month and declined -1.9% on the quarter, the difference reflecting the strength of the US dollar over the periods.

Within equities our slight tilt towards cheaper stocks and regions was beneficial in terms of performance with the more value orientated holdings such as Dodge & Cox Global Stock (+2.0%) and iShares FTSE100 (+0.4%) managing to buck the downward trend given the support of surging energy and material prices. In comparison, the more growth orientated Fundsmith Equity (-12.4%) and our emerging market positon TT Emerging Market Equity (-12.2%) fell sharply on the quarter. The prospect of rising interest rates weighed on more growth orientated stocks during the period, whilst the combination of a stronger US dollar, rising COVID cases in China, and the Russia-Ukraine conflict were all headwinds for sentiment in emerging markets.

Fixed income positions were negative on the month and quarter. However, our overall bias towards short dated corporate bonds, such as AXA US Short Duration High Yield (-1.5%), was a tailwind for relative performance, as the rise in government bond yields caused longer maturity bonds to underperform, as shown by the Vanguard US Government Bond Index Fund (-5.5%). However, the decline is risk appetite and increase in volatility meant all fixed income holdings generated negative returns for the period, as credit spreads widened.

Elsewhere, performance within real assets and alternative strategies was wide-ranging across our holdings. Within property, BMO Commercial Property was up strongly (+11.0%) reflecting reduced concern about the impact of Omicron on UK economic activity and strong quarterly results. In comparison, our listed global REITs holding Nedgroup Global Property Fund (-3.1%) declined, albeit by a lesser degree than global equities. Within infrastructure, our exposure to renewable energy infrastructure was positive for returns, the sector saw good quarterly results and was seen as further benefiting from the current high level of electricity prices and inflation with Greencoat UK Wind (+9.8%), JLEN Environmental Assets Group rallied (+9.1%), Greencoat Renewables (+3.4%) and The Renewables Infrastructure Group (+1.9%) all rising over the quarter. The more traditional infrastructure holdings, 3i Infrastructure (-2.0%) and Atlas Global Infrastructure (+5.5%), were more mixed during the period, but together easily outperformed global equity markets, as investors favoured real assets. Within our alternative positions it is also worth highlighting the divergence in performance of our private equity holdings, Oakley Capital Investments (+1.2%) and Princess Private Equity (-16.4%). Oakley managed to buck the downward trend in markets after releasing very strong results for the second half of 2021. Particularly encouraging, was to see that Oakley's existing portfolio remains on relatively conservative multiples, supporting our view of good growth potential from a well-diversified portfolio. Finally the two holdings in song royalties, Hipgnosis Songs Fund (-2.2%) and Round Hill Music Royalty Fund (+2.3%), recorded mixed results for the quarter. However, they both rallied strongly in March with Hipgnosis, for example, up over +12% for the month, which was fortuitous given we added to our position in February.

In terms of other portfolio activity during the month, we participated in a capital raise by SDCL Energy Efficiency Income (SEEIT), a UK domiciled investment trust listed on London Stock Exchange. SEEIT is the first and remains the largest listed company of its kind to invest exclusively in the energy efficiency sector. Projects that SEEIT invests in either provide on-site generation of power and heat, or projects which reduce energy demand. Its portfolio comprises assets across the UK, Europe and North America. Given the current low yielding environment, we believe SEEIT will be a valuable addition to portfolios due its stable income, attractive dividend, and low correlation with traditional markets. Finally, towards the end of the period, we further reduced our exposure to fixed income with the aim of redeploying proceeds into better opportunities caused by the recent dislocation in markets.

Nedbank Private Wealth
Nedbank Private Wealth is an Authorised Financial Services Provider in South Africa
