General Information

Portfolio Profile

BENCHMARK/TARGET RETURN

Inflation + 5 - 7% per annum after fees over rolling 7-year periods.

This portfolio will seek to deliver real capital growth through a blended allocation to risk assets, namely equity funds. The portfolio will accordingly be exposed to equity market risk and returns will be volatile. Any asset allocation changes will be determined by the monthly strategic investment committee, who seek to achieve optimal diversification of the asset classes by making use of proprietary research tools. The portfolio is structured as a fund of funds.
